Health Conditions of Students Continue Widespread

Health conditions at Lafayette College are not improving as rapidly as was hoped. Kandler, college physician, who has been treating patients with fever and chills, says that the number of cases has not decreased at all. "It is now the opinion of the medical men," he says, "that the epidemic is spreading from the central nervous system to the general body."

Clubs and Fraternities Continue as Usual

The majority of clubs and fraternities are continuing to meet as usual. The Interfraternity Conference met last week to discuss the problem of the epidemic. The conference is working to find a solution to the problem and has asked for the cooperation of all students.

Sports and Activities Continue Despite Epidemic

Despite the spread of the epidemic, sports and activities are continuing as usual. The basketball team is scheduled to play this weekend, and the football team is scheduled to play next weekend. The Lafayette College Band is also scheduled to perform at the university's annual concert.
